WFTC Pilots n Paws is a Sub division of Windhoek Flight Training Center and do this on a non-profitable basis. Our aim is bring our Volunteer Private Pilots, doing hour building and those who rescue animals together. We intend to focus on all kinds of animals, from small to large, given that they are in capacity to do so.

WFTC Pilot n Paws will only provide the environment in which those involved can work together and arrange or schedule rescue flights. There should always be a sending party and receiving party involved as our intent is not to coordinate or arrange those providing these valuable services.

Aviation is a wonderful alternative to ground transport and should be a rewarding endeavor for all parties involved in giving a second chance to animals in need.

WFTC Pilots n Paws is dedicated to the safe transport of all animals and look forward to working with all Animal Rescue parties help bring people and pets together. We truly believe that after all the affection pets have shown us, they deserve some in return, Love and a second chance.

WFTC Pilots n Paws will provide the Pilot, aircraft and fuel within the borders of Namibia. We have a Piper Cherokee, Cessna 182 and a Helicopter available for transport and emergency rescue.

Subject to terms and conditions.
